

Bridging the Gaps in Hypertension Studies

Narsingh Verma

Department of Physiology, King George's Medical University, Lucknow, Uttar Pradesh, India

Great Moments,

We bring the issue with some Original Research studies on Proton Pump Inhibitor Therapy in Metabolic Syndrome and Gastroesophageal Reflux Disease and the effect of Chlorthalidone Therapy on Blood pressure (Systolic & Diastolic) in advanced CKD patients .

The issue also brings interesting insights through reviews on Harnessing Magnesium: A Key to Cardiovascular and Metabolic Wellness, Coffee and Blood Pressure, discussing its effect on us, and later an interesting study on Hypertension beyond Lifestyle: The Underrecognized Impact of Drugs and Medical Procedures.

We are excited to encourage the researchers to read and engage more with our vision of improving Quality of Life.

Happy Researching!

Editor,

Hypertension Journal

(Indian Society of Hypertension)
